

Server Management Services

LRS offers Remote Server Management that leverages our consistent “always on” monitoring of your server environments to ensure you're performing at your peak. We monitor key performance metrics like; load, server performance, and security posture. Our experts can install OS software updates and take care of all the technical issues related to your server environment.

SERVER MANAGEMENT FEATURES

- Server monitoring for performance, availability and capacity
- Application Performance Management
- AV / Patch Updates, Asset & Inventory Management
- Disaster Management and IT Business Continuity Management

KEY CLIENT BENEFITS

- Availability, performance & fault monitoring for server computing infrastructure
- NMS implementation using SNMP and WMI
- Automated reporting & alerts for fault and threshold breach & utilization
- Automated monitoring of critical services, i.e., Web, FTP, DNS, DHCP, etc

**We support you
around the clock**
