Products and Partnerships

Arctic Wolf
Our innovative platform and concierge delivery model enable us to provide better protection in a way that is uniquely fast and cost effective. Better, Faster, Stronger with Arctic Wolf.

CarbonHelix
CarbonHelix, our partner, works with organizations to improve attack detection and incident response, harden defenses, and simplify application access without compromise. The CarbonHelix team has deep security experience in a range of industries.

Cisco
As the largest enterprise cybersecurity company in the world, we lead the way with solutions that are driving the industry in SASE, XDR, and zero trust. Integrating it all is Cisco SecureX, providing simplicity, visibility and efficiency across your security infrastructure.

Cloud Range
Prepare your SOC Analysts and Incident Responders with Cloud Range's detection, response, and remediation training exercises. Using real tools from the world's leading technology manufacturers on a real virtual enterprise network, your team will be prepared to win every time.

Crowdstrike
CrowdStrike protects the people, processes and technologies that drive modern enterprise. A single agent solution to stop breaches, ransomware, and cyber attacks—powered by world-class security expertise and deep industry experience.

F5
F5 Networks, Inc. is a multinational American company which specializes in Application Delivery Networking technology that optimizes the delivery of network-based applications and the security, performance, availability of servers, data storage devices, and other network resources.

Fortinet
Fortinet is an American multinational corporation that develops and sells cybersecurity solutions, such as physical firewalls, antivirus software, intrusion prevention systems and endpoint security components.

Fortra
Fortra, the new face of HelpSystems. At Fortra, we're creating a simpler, stronger, and more straightforward future for cybersecurity by offering a portfolio of integrated and scalable solutions.

HCL Software
Enterprise Security from application to endpoint. Vulnerability detection, mitigation, and remediation—before during and after the attack. HCL Software fulfills the needs of clients with AI & Automation, Data & Analytics and Digital Transformation and Enterprise Security solutions.

IBM
IBM Security offers one of the most advanced and integrated portfolios of enterprise security products and services. Supported by IBM X-Force research, providing solutions to help organizations drive security into the fabric of their business so they can thrive in the face of uncertainty.

Kudelski
Kudelski Security is an innovative provider of intelligent, tailored cybersecurity solutions to global enterprises and public sector institutions. With thousands of patents worldwide, we leverage a heritage of innovation to create and deliver solutions to the toughest cybersecurity challenges.

Meraki
Meet ever-changing IT demands with our cloud network platform that easily adapts to your vision through robust APIs, insights, and apps. Simplify deployment and management, secure physical and digital assets and create smarter workspaces with Meraki.

Microsoft
Microsoft empowers your organization's defenders by putting the right tools and intelligence in the hands of the right people. Get insights with our cloud-native SIEM, Microsoft Sentinel. Use integrated, automated XDR to increase efficiency and effectiveness with Microsoft 365 Defender and Microsoft Defender for Cloud.

Paessler PRTG
We offer expert monitoring of all kinds of infrastructures; environments of all sizes with either on premises or cloud-based monitoring. Offering IT monitoring software for every challenge and priced for your convenience.

Palo Alto Networks
Palo Alto Networks, the global cybersecurity leader, delivers innovation to enable secure digital transformation—even as the pace of change is accelerating. We enable cyber transformation.

Precisely
With our Data Integrity Suite, with its flexible and modular approach, we can meet your needs where you are on your journey to data integrity. We build possibilities grounded in data by ensuring accuracy, consistency, and context of your data.

Proofpoint
More than 90% of targeted attacks start with email, and these threats are always evolving. Proofpoint Targeted Attack Protection (TAP) stays ahead of today's attackers with an innovative approach that detects, analyzes, and blocks advanced threats before they reach the inbox.

Red Hat
Automation helps IT organizations manage hybrid cloud environments quickly and efficiently. Red Hat Ansible Automation Platform is a simple yet powerful automation solution that delivers agility and flexibility, no matter where your team is on its automation journey.

SentinelOne
More Capability. Less Complexity. SentinelOne is pioneering the future of cybersecurity with autonomous, distributed endpoint intelligence aimed at simplifying the security stack without forgoing enterprise capabilities. Our technology is designed to scale people with automation and frictionless threat resolution.

Solarwinds
The SolarWinds Platform is the only unified monitoring, observability, and service management platform. It's the foundation for a new generation of observability solutions and provides the architecture on how we solve observability challenges for our customers.

Tenable
Tenable's approach to exposure management combines visibility across all facets of the attack surface with business context so you can understand your organization's cyber risk and prioritize mitigation. Exposure Management for the modern attack surface.

Thycotic
We make enterprise-grade privilege management accessible for everyone by eliminating the need for complex security tools and prioritizing productivity, flexibility and control. You'll achieve more with Thycotic than with any other privilege security tool.

Veeam
Veeam provides organizations with resiliency through a platform that provides data security, recovery and freedom for your hybrid cloud. Secure backup, fast recovery, and proactive monitoring and analytics are the Veeam Data Platform.

Virtual Armour
VirtualArmour (VA) is a global Managed Security Services Provider (MSSP) that delivers custom security services tailored to meet the needs of our clients. VA manages the entire security lifecycle, from initial alerting, to the investigation phase to resolution.

VM Ware
Go beyond virtualization with multi-cloud services for cloud native applications, cloud infrastructure, cloud management, security, and networking, and anywhere workspaces. Move fast and be free in a multi-cloud world with VM Ware.
