We Deliver Results+

SOLUTION OVERVIEW

From the data center to the boardroom, we design solutions that enable your business to achieve results+ as well.

LRS IT Solutions strives to earn our clients' trust by helping them determine the IT deployment that's best for them. Whether that's a public, private or hybrid cloud or an on-premise environ-ment, our experts can deliver results+.

We provide analytical insight on how data can be used to solve business problems and achieve corporate goals, all the while leveraging industry-leading security solutions to close critical vulnerabilities and manage cyber threats.

Our partners in the IT world are organizations providing best-of-breed solutions, including IBM, HPE, VMware, IBI, Veeam, and many others. That means we never approach clients with a ready-made, one-size-fits-all product. Our approach is to consult with you, learn about your organization, and design the IT solution that's best.

We offer solutions in five key areas.

Security

Our Security team focuses on your IT Infrastructure. From Penetration Testing to Remote Monitoring to Vulnerability Assessments, our highly certified team can identify and solve your security risks. We strive to be your trusted security partner, helping you safeguard your infrastructure and data from increasing cyberthreats.

Infrastructure

The reliability of the products you use in your data center dictate its effectiveness. We understand that, and we've partnered with leaders in hardware and software to ensure the agility of your data center. Our Infrastructure team knows technology and we know how to specify and configure that technology to suit your operation needs for efficiency+

Analytics

Whether you are looking to extend the power of the solutions you already have in place, or implement new solutions to get more from your data, we have the experience to improve efficiency, mitigate risk, prevent fraud, reduce costs, identify new markets and more. From Big Data, Information Management, Business Intelligence, Predictive Analytics or Data Warehousing our highly certified consultants can help you understand the real information in all of your data for business insights+

Cloud

We focus on helping clients be more nimble by using cloud technology to rapidly deploy infrastructure in support of new business initiatives. These projects include gaining secure access to data for leveraging analytics and implementing new functionality with minimal disruption. Cloud technolgoy can also help businesses scale back down just as quickly, ensuring flexibility+

Professional Services

Service has always been part of the solutions we deliver. Our Professional Services team can design and implement your technology solution, perform ongoing health checks, and manage operations remotely. From designing an on-prem hardware solution to providing backup, DR, infrastructure "as a service," our Professional Services experts help you ensure efficiency+
