

VMWARE HORIZON VIEW IMPLEMENTATION

ENABLE WORKFORCE MOBILITY THROUGHOUT THE ENTERPRISE. WE CAN HELP.

When your organization considers adopting BYOD and workforce mobility initiatives, you recognize the need to provide users access to their desktops from anywhere and on any device. VMware Horizon View delivers the ability to manage desktops and provide users with what they want when they need it.

LRS will work with you to determine a desktop and mobility strategy that is best suited for your needs, including local and remote users.

An Open Systems specialist will work with your team to provide the following:

- › We will provide implementation services including sizing, installation, configuration, and customization of desktops.
- › We will document the specific configuration of your VMware[®] Horizon View[™] environment.

- › Our consultant will provide skills transfer to your staff throughout the engagement.
- › Once we have installed VMware Horizon View, LRS will conduct a planning meeting to discuss ongoing support and maintenance.

LRS[®] IT Solutions can provide the level of Horizon View implementation services your organization needs. Call us for more information.
