

Drive Your Data Center
Safely Into the Future

Insights And Transparency From The Data Center Floor To The Boardroom

One Single Analytics Platform for ALL IT Business Operations Needs

Feel Your Business IT In a Touch Of a Button

Correlata provides a new business-centric approach for managing an entire IT infrastructure and services, allowing the organization to run IT as a business, ensuring companies use their infrastructure investments coordinating to business objectives, regulations and compliance.

Correlata makes it possible for customers to ensure IT management and operations Maze Visible based on new technology that delivers the agility and economics of the public cloud without sacrificing the control and security of on-premise infrastructure.

Our new Business-Centric approach puts operations IT on the spotlight so you can master your IT and grow your business in a language that makes sense from the data center floor to the boardroom.

WHAT WE DO: CONNECTING THE DOTS WITH SMARTER ANALYTICS, Dealing with Today's Digital Transformation Challenges

Breaking the Silo- Effect Complexity

With holistic analytics that provide complete transparency & highest visibility. Across all vendors- no matter what type of system, application or platform

Turning Data Into Real Practical Insights

Enabling operations visibility into key business performance indicators to help to quantify the value and revenue coming directly from IT

Lowering Total Cost of Ownership

Save & avoid outages & critical failures costs using the right analytics technology to help prevent possible operation risks & cut unnecessary expenses

**WE ARE DATA CENTER TRANSFORMERS
BE ABOUT IT, OR BE WITHOUT IT!**
